

Room outline grid (1:50 scale)

You may find this grid helpful when sketching an outline of your room (the distance between the small dots represents 100mm and between the large dots 1m). Add in any furniture that will remain in place, and indicate windows, doors radiators and power points. Scan or photograph your sketch and email to us, including your contact phone number. We will call to discuss the furniture you would like to plan. Photographs of your room would also be useful.
